INTERNET TRENDS 2018

Mary Meeker

May 30 @ Code 2018

KLEINER PERKINS

Thanks

Kleiner Perkins Partners

Ansel Parikh & Michael Brogan helped steer ideas and did a lot of heavy lifting. Other contributors include: Daegwon Chae, Mood Rowghani, Eric Feng (E-Commerce) & Noah Knauf (Healthcare). In addition, Bing Gordon, Ted Schlein, Ilya Fushman, Mamoon Hamid, Juliet deBaubigny, John Doerr, Bucky Moore, Josh Coyne, Lucas Swisher, Everett Randle & Amanda Duckworth were more than on call with help.

Hillhouse Capital

Liang Wu & colleagues' contribution of the China section provides an overview of the world's largest market of Internet users.

Participants in Evolution of Internet Connectivity

From creators to consumers who keep us on our toes 24x7 + the people who directly help us prepare the report. And, Kara & team, thanks for continuing to do what you do so well.

Context

We use data to tell stories of business-related trends we focus on. We hope others take the ideas, build on them & make them better.

At 3.6B, the number of Internet users has surpassed half the world's population. When markets reach mainstream, new growth gets harder to find - evinced by 0% new smartphone unit shipment growth in 2017.

Internet usage growth is solid while many believe it's higher than it should be. Reality is the dynamics of global innovation & competition are driving product improvements, which, in turn, are driving usage & monetization. Many usability improvements are based on data - collected during the taps / clicks / movements of mobile device users. This creates a privacy paradox...

Internet Companies continue to make low-priced services better, in part, from user data. Internet Users continue to increase time spent on Internet services based on perceived value. Regulators want to ensure user data is not used 'improperly.'

Scrutiny is rising on all sides - users / businesses / regulators. Technology-driven trends are changing so rapidly that it's rare when one side fully understands the other...setting the stage for reactions that can have unintended consequences. And, not all countries & actors look at the issues through the same lens.

We focus on trends around data + personalization; high relative levels of tech company R&D + Capex Spending; E-Commerce innovation + revenue acceleration; ways in which the Internet is helping consumers contain expenses + drive income (via on-demand work) + find learning opportunities. We review the consumerization of enterprise software and, lastly, we focus on China's rising intensity & leadership in Internet-related markets.

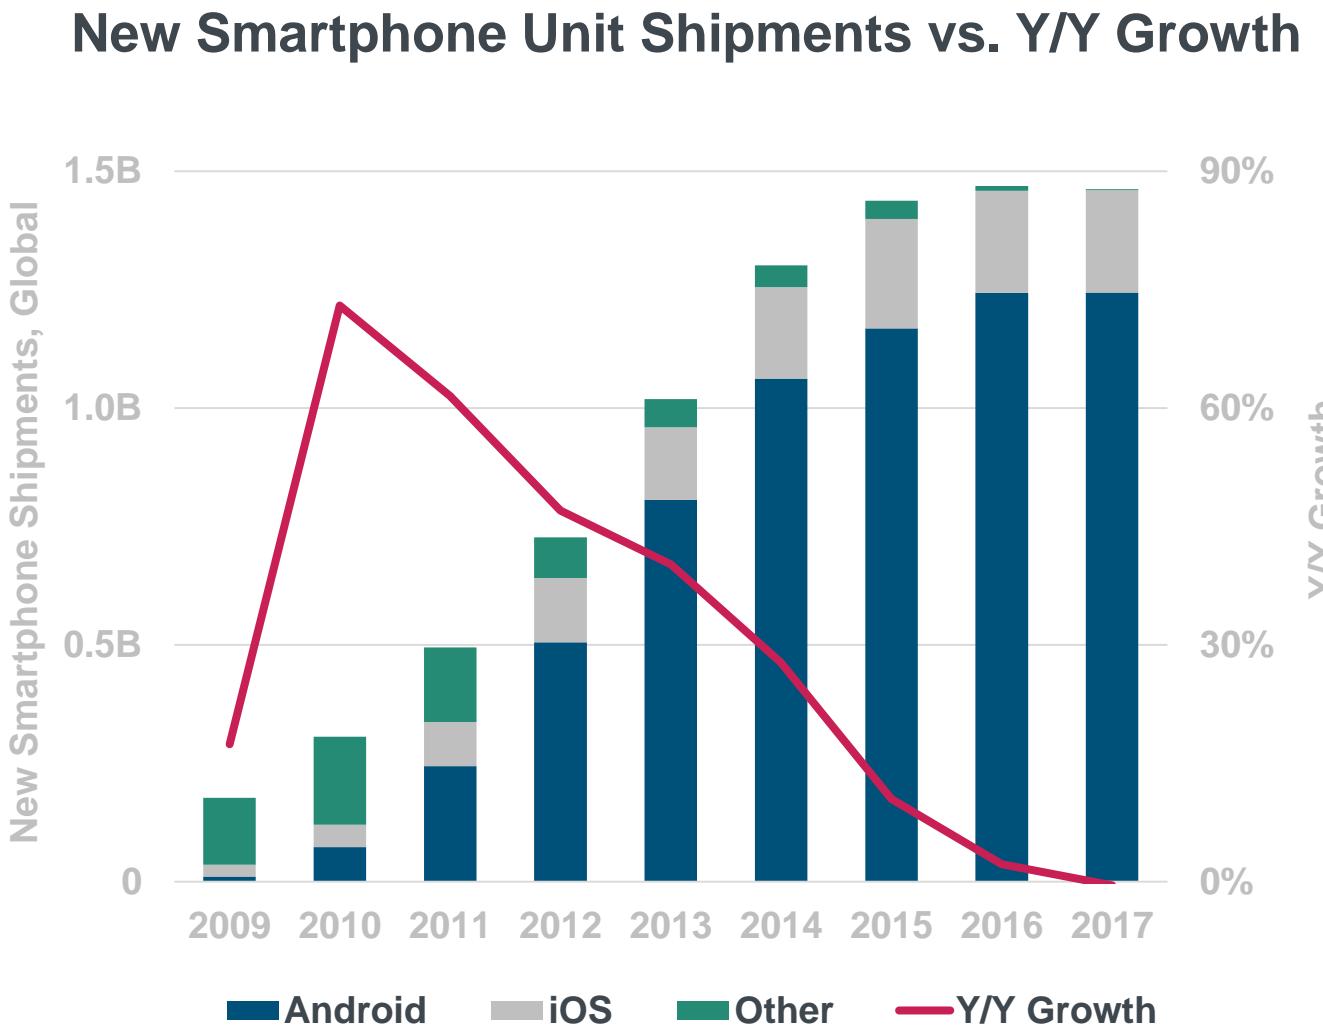

Internet Trends 2018

1) Users	5-9
2) Usage	10-12
3) Innovation + Competition + Scrutiny	13-43
4) E-Commerce	44-94
5) Advertising	95-99
6) Consumer Spending	100-140
7) Work	141-175
8) Data Gathering + Optimization	176-229
9) Economic Growth Drivers	230-237
10) China (Provided by Hillhouse Capital)	237-261
11) Enterprise Software	262-277
12) USA Inc. + Immigration	278-291

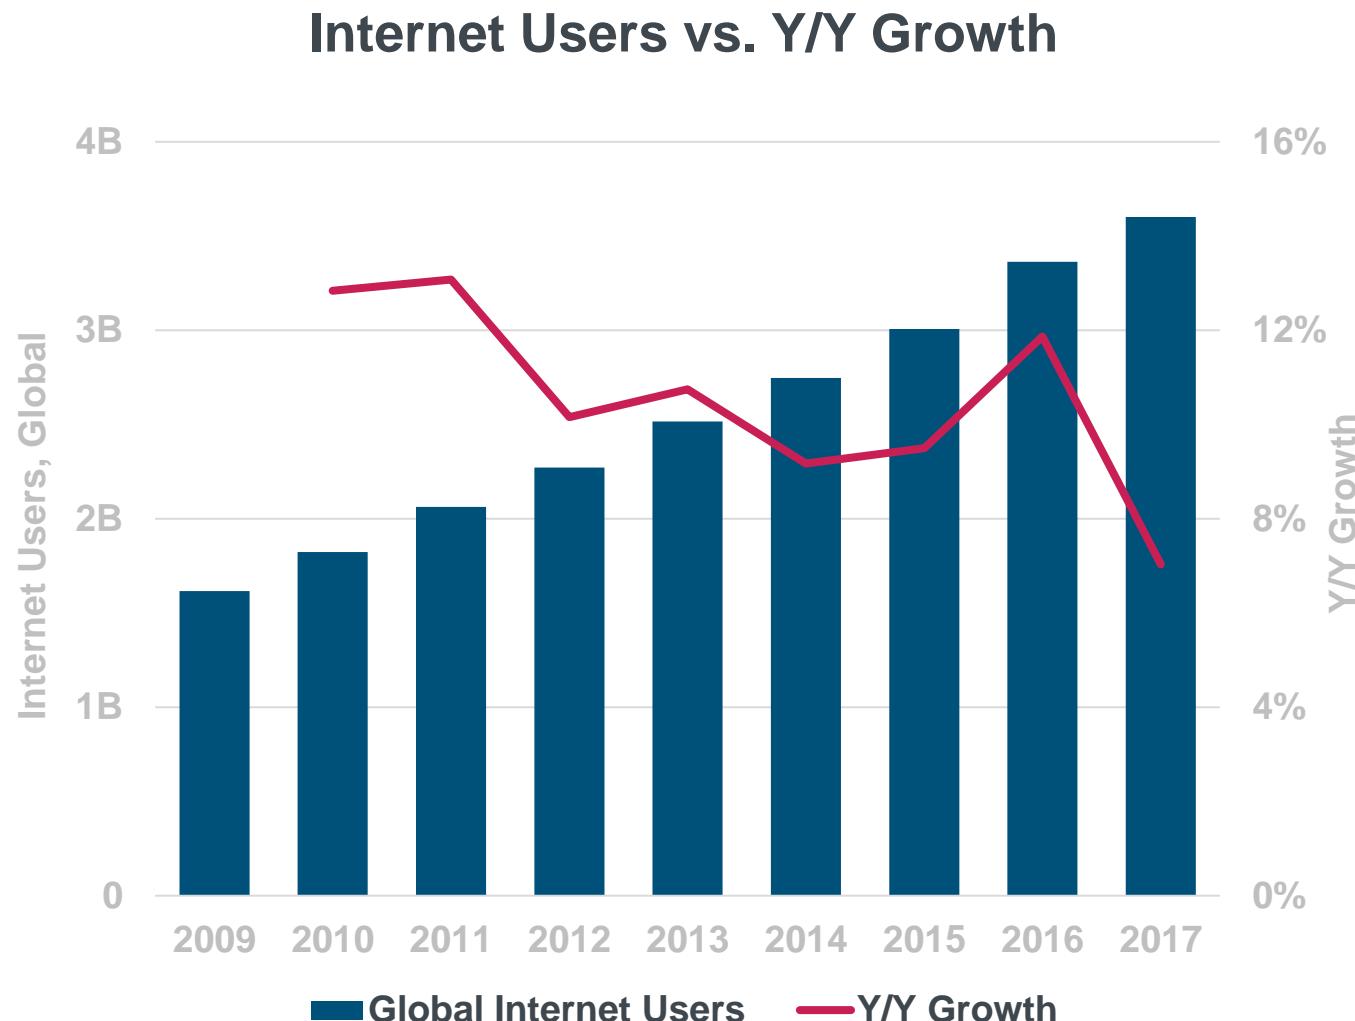

INTERNET DEVICES + USERS =

GROWTH CONTINUES TO SLOW

Global New Smartphone Unit Shipments =
No Growth @ 0% vs. +2% Y/Y

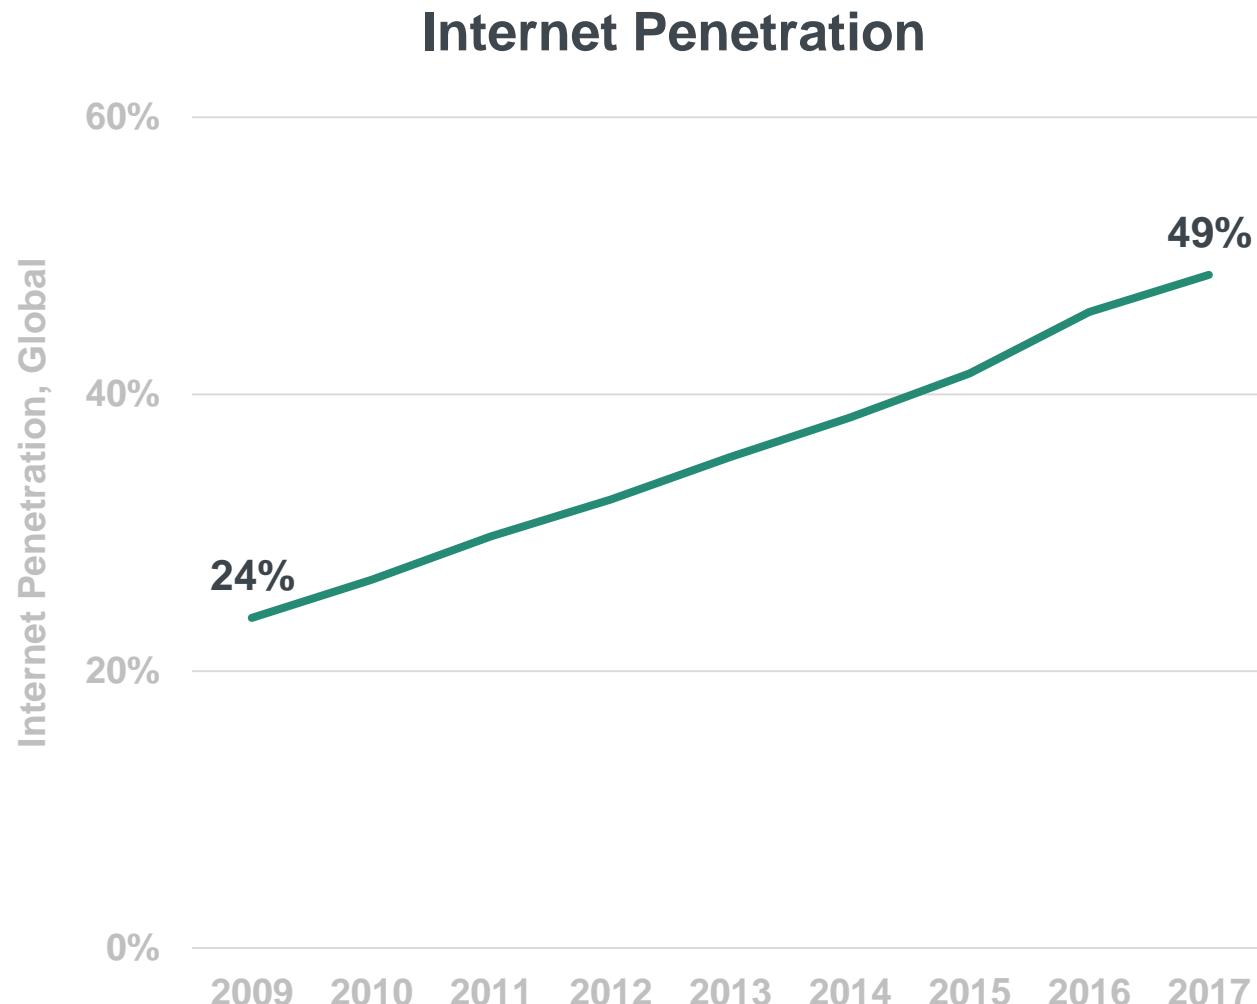

Global Internet Users = Slowing Growth @ +7% vs. +12% Y/Y

New Smartphone Shipments – ASP

Source: Apple, Google, Katy Huberty @ Morgan Stanley, IDC. *ASP Based on Morgan Stanley's new smartphone shipment breakdown by taking the midpoint of each \$50 price band & assuming a \$1,250 ASP for smartphones over \$1,000. Note: Deloitte estimates that 120MM used smartphones were traded in 2016 and 80MM in 2015 which may further reduce smartphone costs to consumers as the ratio of used to new devices rises. Apple 2016 = iPhone 7 Plus, 2017 = iPhone X. Google 2016 = Pixel, 2017 = Pixel 2.

Access = WiFi Adoption Rising

WiFi Networks

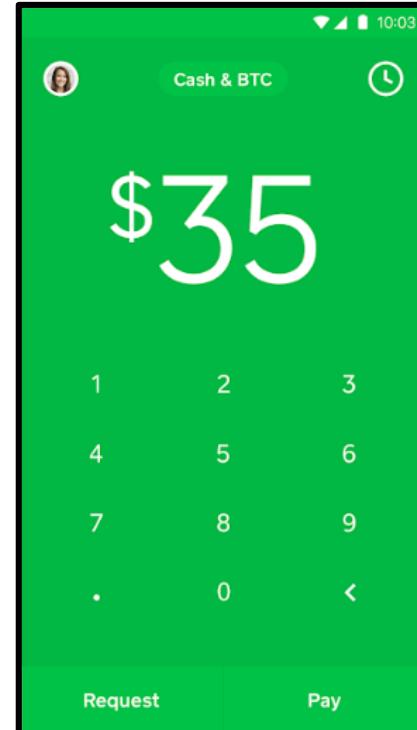

Source: WiGLE.net as of 5/29/18. Note: WiGLE.net is a submission-based catalog of wireless networks that has collected >6B data points since launch in 2001. Submissions are not paired with actual people, rather name / password identifies which people use to associate their data.

Privacy Paradox

Internet Companies

Making Low-Priced Services Better, in Part, from User Data

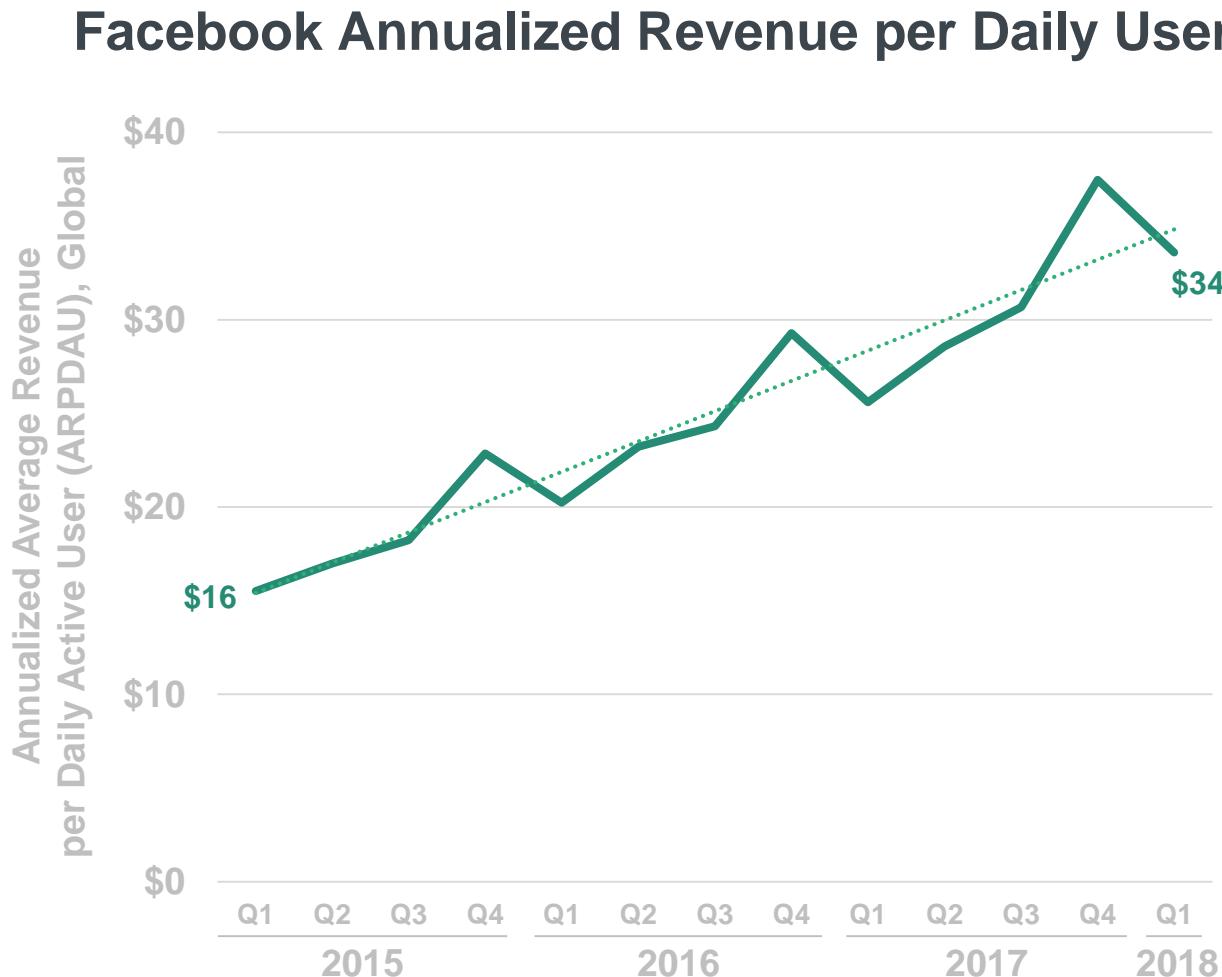

Internet Users

Increasing Time on Internet Services Based on Perceived Value

Regulators

Want to Ensure User Data is Not Used ‘Improperly’

Rising User Engagement = Drives Monetization + Investment in Product Improvements...

Source: Facebook (4/18). Note: Facebook Daily Active Users (DAU) defined as a registered Facebook user who logged in and visited Facebook on desktop or mobile device, or took action to share content or activity with his or her Facebook friends or connections via a third-party website that is integrated with Facebook, on a given day.
ARPDAU calculated by dividing annualized total revenue by average DAU in the quarter.

...Rising Monetization + Data Collection = Drives Regulatory Scrutiny

Data / Privacy

The European Data Protection Regulation will be applicable as of May 25th, 2018 in all member states to harmonize data privacy laws across Europe.

- European Union, 5/18

Facebook's collection & use of data from third-party sources is abusive.

- German Federal Cartel Office, 12/17

Competition

Commission fines Google €2.42 billion for abusing dominance as search engine by giving illegal advantage to its own comparison shopping service.

- European Commission, 6/17

Commission approves acquisition of LinkedIn by Microsoft, subject to conditions.

- European Commission, 12/16

Safety / Content

The Germany Network Enforcement Act will require for-profit social networks with >2MM registered users in Germany to remove unlawful content within 24 hours of receiving a complaint.

- German Federal Ministry of Justice & Consumer Protection, 10/17

Taxes

Commission finds Luxembourg gave illegal tax benefits to Amazon worth around €250 million.

- European Commission, 10/17

Internet Companies = Key to Understand Unintended Consequences of Products...

*We're an idealistic & optimistic company.
For the first decade, we really focused on all the good that
connecting people brings.
But it's clear now that we [Facebook] didn't do enough.*

***We didn't focus enough on preventing abuse & thinking
through how people could
use these tools to do harm as well.***

- Mark Zuckerberg, Facebook CEO, 4/18

...Regulators = Key to Understand Unintended Consequences of Regulation

This month, the European Union will embark on an expansive effort to give people more control over their data online...

As it comes into force, Europe should be mindful of unintended consequences & open to change when things go wrong.

- Bloomberg Opinion Editorial, 5/8/18

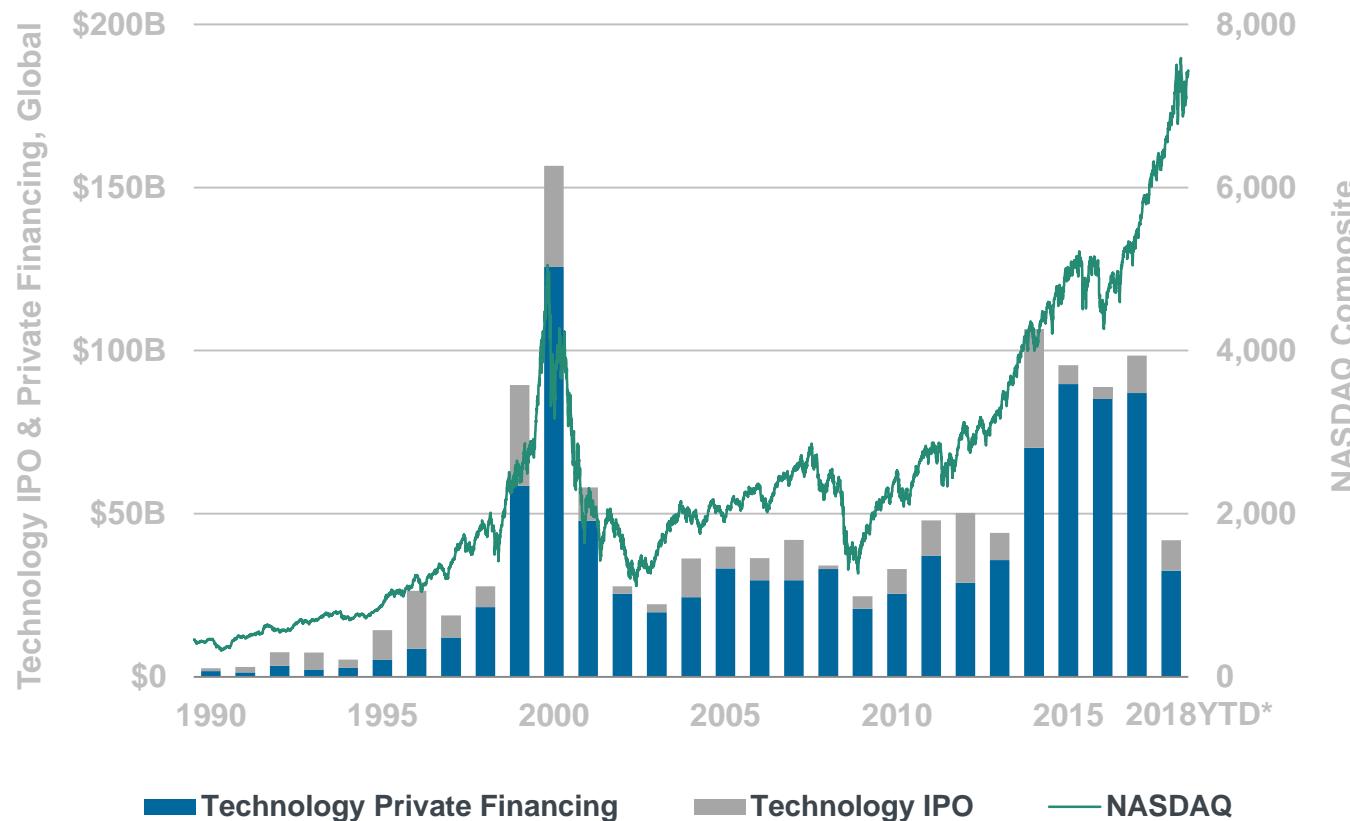

*It's Crucial To Manage For
Unintended Consequences...*

*But It's Irresponsible to Stop
Innovation + Progress*

USA Internet Leaders =
***Aggressive + Forward-Thinking
Investors for Years***

Investment (Public + Private) Into Technology Companies = High for Two Decades

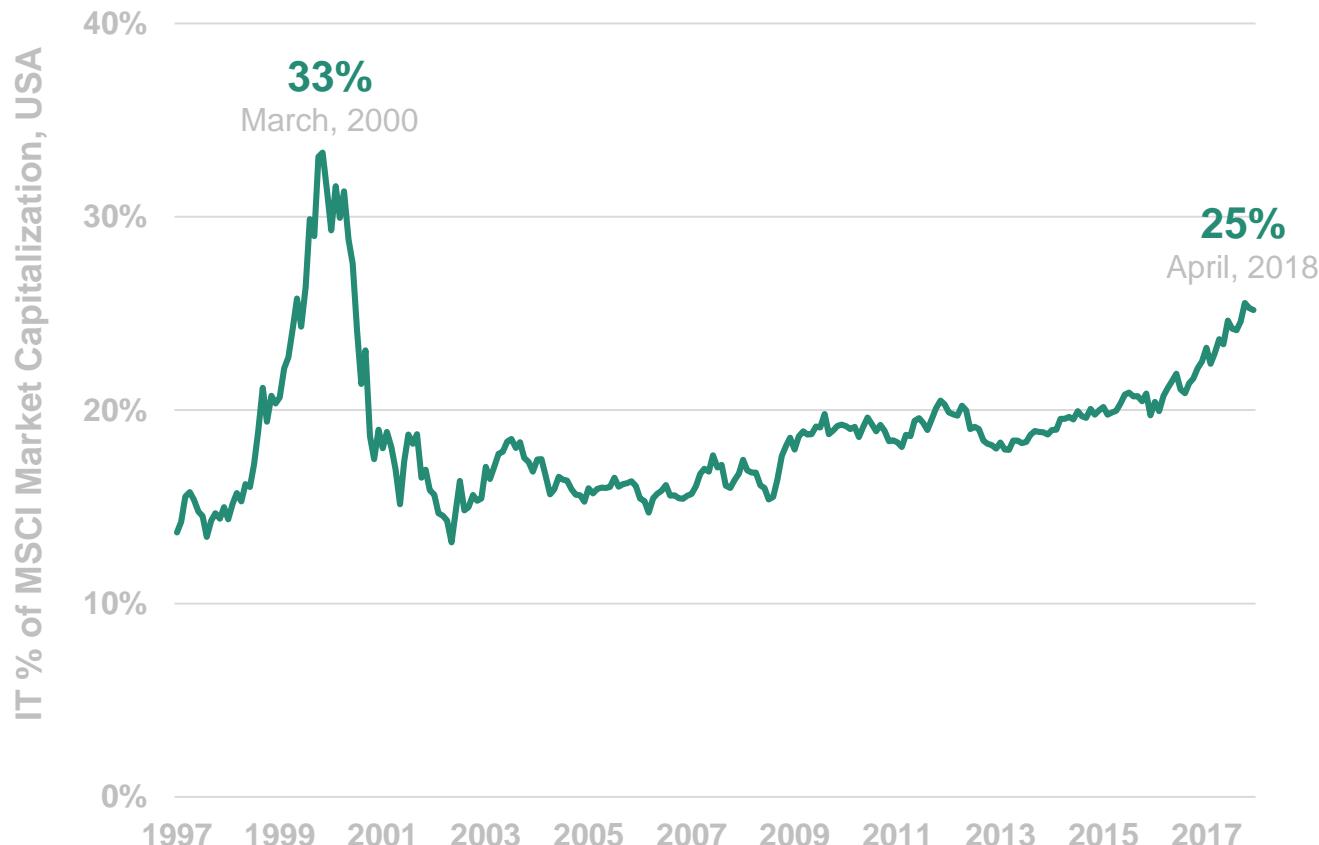

Global USA-Listed Technology IPO Issuance & Global Technology Venture Capital Financing

Source: Morgan Stanley Equity Capital Markets, *2018YTD figure as of 5/25/18, Thomson ONE. All global USA-listed technology IPOs over \$30MM, data per Dealogic, Bloomberg, & Capital IQ. 2012: Facebook (\$16B IPO) = 75% of 2012 IPO \$ value. 2014: Alibaba (\$25B IPO) = 69% of 2014 IPO \$ value. 2017: Snap (\$4B IPO) = 34% of 2017 \$ value.

Technology Companies = 25% & Rising % of Market Cap, USA

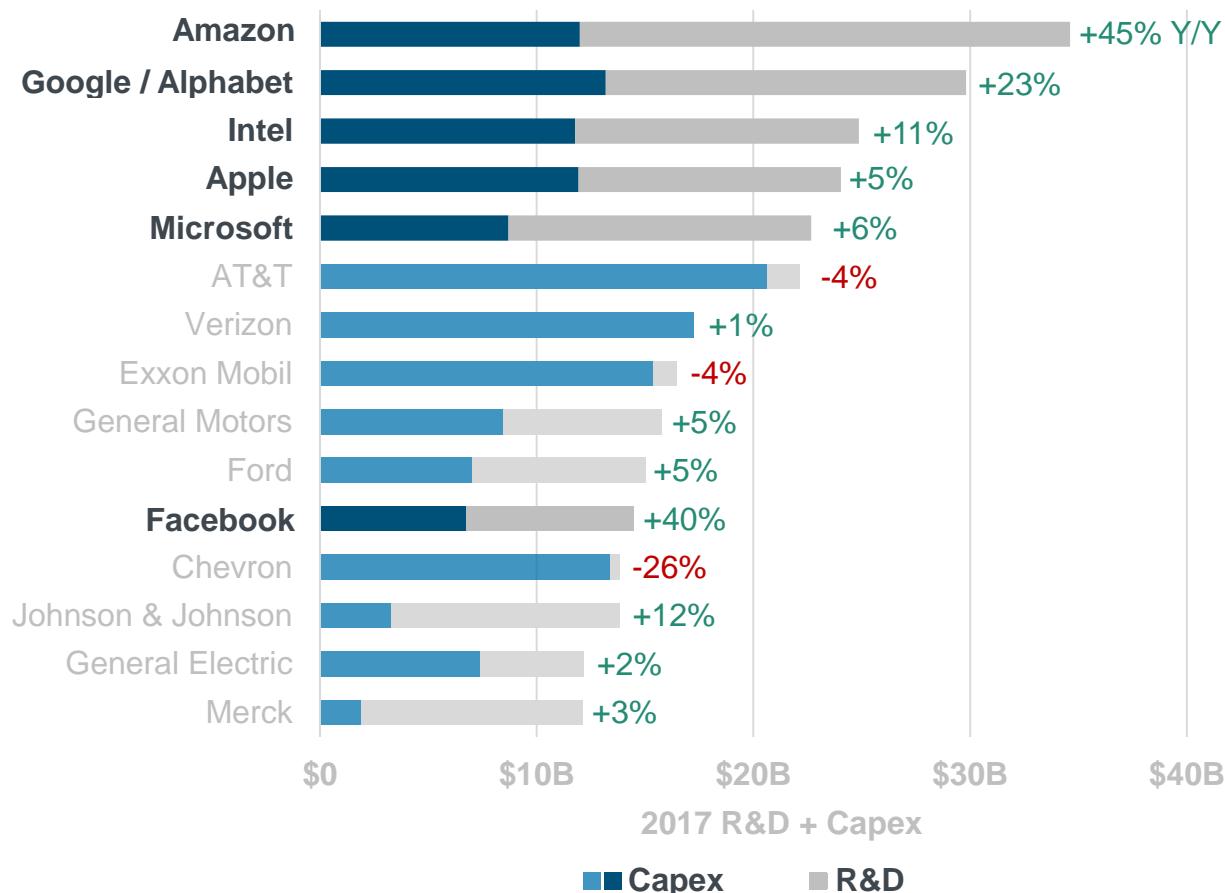

USA Information Technology % of MSCI Market Capitalization

Source: FactSet, Katy Huberty @ Morgan Stanley. MSCI, Formerly Morgan Stanley Capital International = American provider of equity, fixed income, hedge fund stock market indexes, and equity portfolio analysis tools. Data refers to MSCI's index of USA publicly traded companies.

Technology Companies = 6 of Top 15 R&D + Capex Spenders, USA

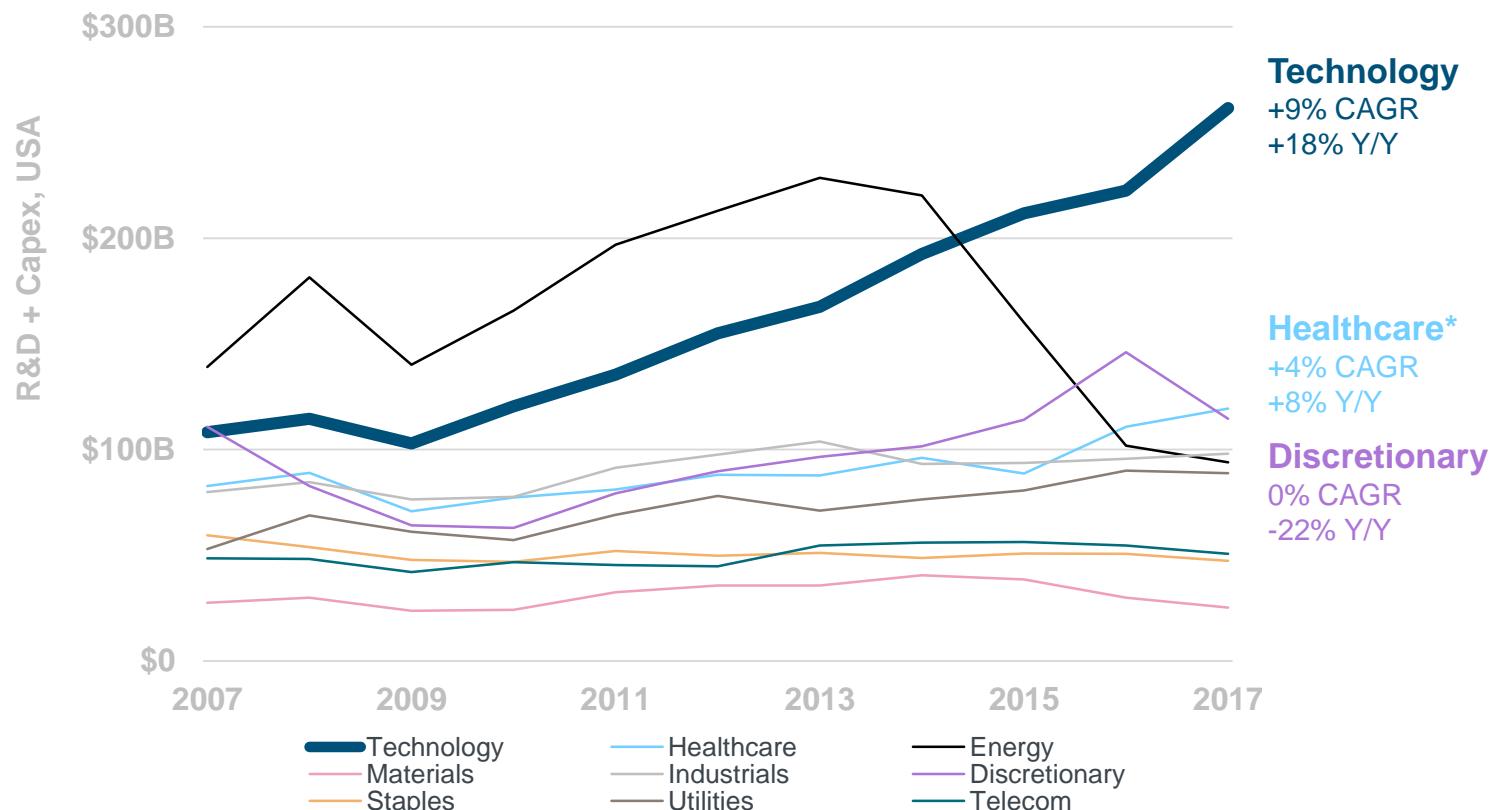

USA Public Company Research & Development Spend + Capital Expenditures (2017)

Source: SEC Edgar, Katy Huberty @ Morgan Stanley. Note: All figures are calendar year 2017. Amazon R&D = Tech & Content spend. General Motors does not include purchases of leased vehicles. AT&T capex does not include interest during construction, just purchases of property, plant, & equipment. Verizon capitalizes R&D expense (i.e. reported as capex). General Electric R&D = GE funded, not government or customer. Bold indicates tech companies.

Technology Companies = Largest + Fastest Growing R&D + Capex Spenders, USA

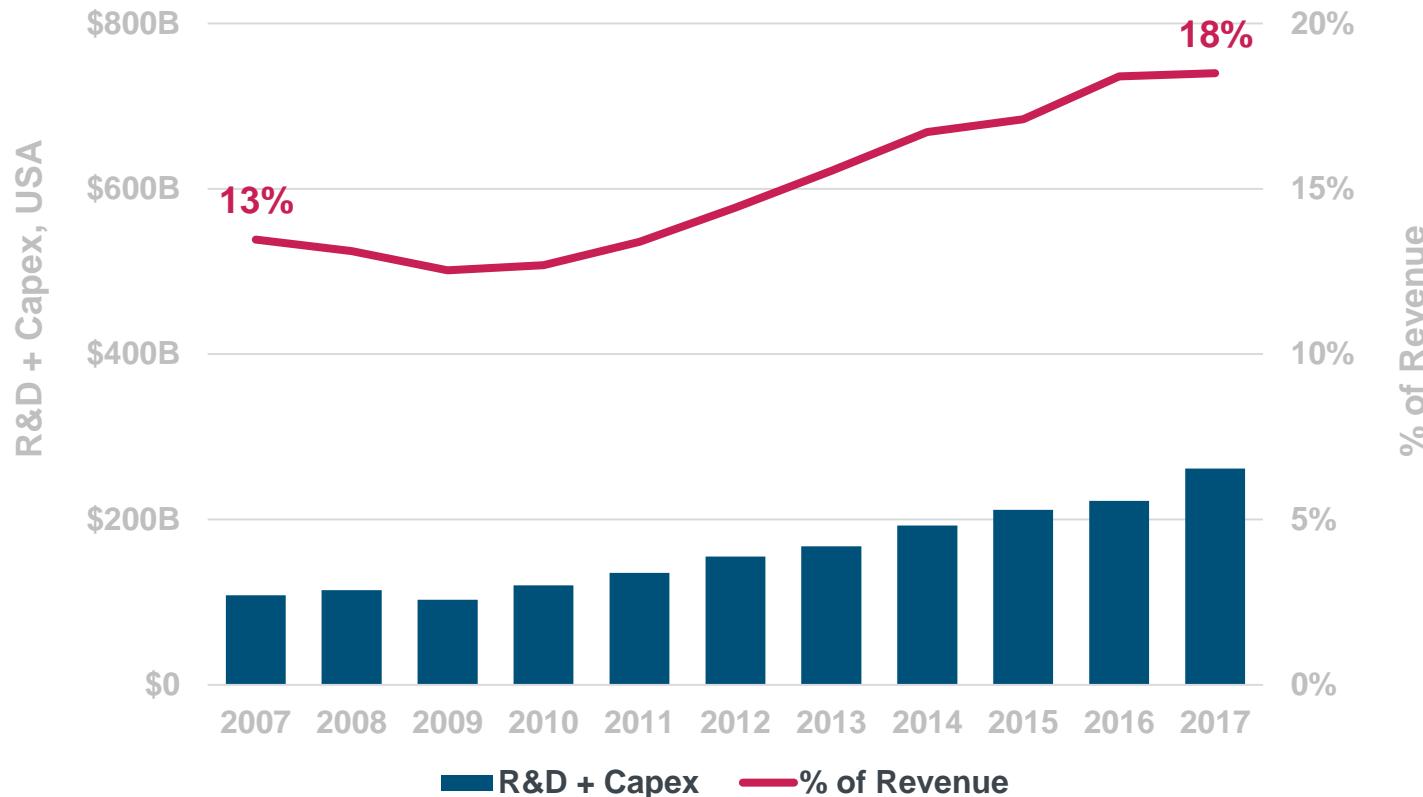

Research & Development Spend + Capital Expenditures – Select USA GICS Sectors

Source: ClariFi, Katy Huberty @ Morgan Stanley. GICS = Global Industry Classification Standard, an industry taxonomy developed in 1999 by MSCI and Standard & Poor's (S&P) for use by the global financial community. CAGR = Compounded annual growth rate from 2007-2017. Note: Amazon, Netflix and Expedia removed from Discretionary Sector & added to Technology. Discretionary includes companies that sell goods & services that are considered non-essential by consumers such as Starbucks (restaurants) & Nike (apparel). See appendix for detailed GICs definition. ClariFi does not have R&D or Capex data from Financial Services. *Healthcare Includes pharmaceutical companies.

Technology Companies =
Rising R&D + Capex as % of Revenue... 18% vs. 13% (2007)

USA Technology Company Research & Development Spend + Capital Expenditures vs. % of Revenue

Source: Clarifi, Katy Huberty @ Morgan Stanley. GICS = Global Industry Classification Standard, an industry taxonomy developed in 1999 by MSCI and Standard & Poor's (S&P) for use by the global financial community. Note: Amazon, Netflix and Expedia removed from Discretionary Sector & added to Technology. Discretionary includes companies that sell goods & services that are considered non-essential by consumers such as Starbucks (restaurants) & Nike (apparel). See appendix for detailed GICs definition.

Social Media = Helping Drive Growth for Emerging DTC Retailers / Brands

Source: Internet Retailer 2017 Top 1,000 Guide. *Data only for E-Commerce sales and shown in 2017 dollars. Chart includes pure-play E-Commerce retailers and evolved pure-play retailers. The Top 1,000 Guide uses a combination of internal research staff and well-known e-commerce market measurement firms such as Compete, Compuware APM, comScore, ForeSee, Experian Marketing Services, StellaService and ROI Revolution to collect and verify information.

Social Media = Ad Engagement Rising...Facebook E-Commerce CTRs Rising

Facebook E-Commerce CTRs (Click-Through Rates)

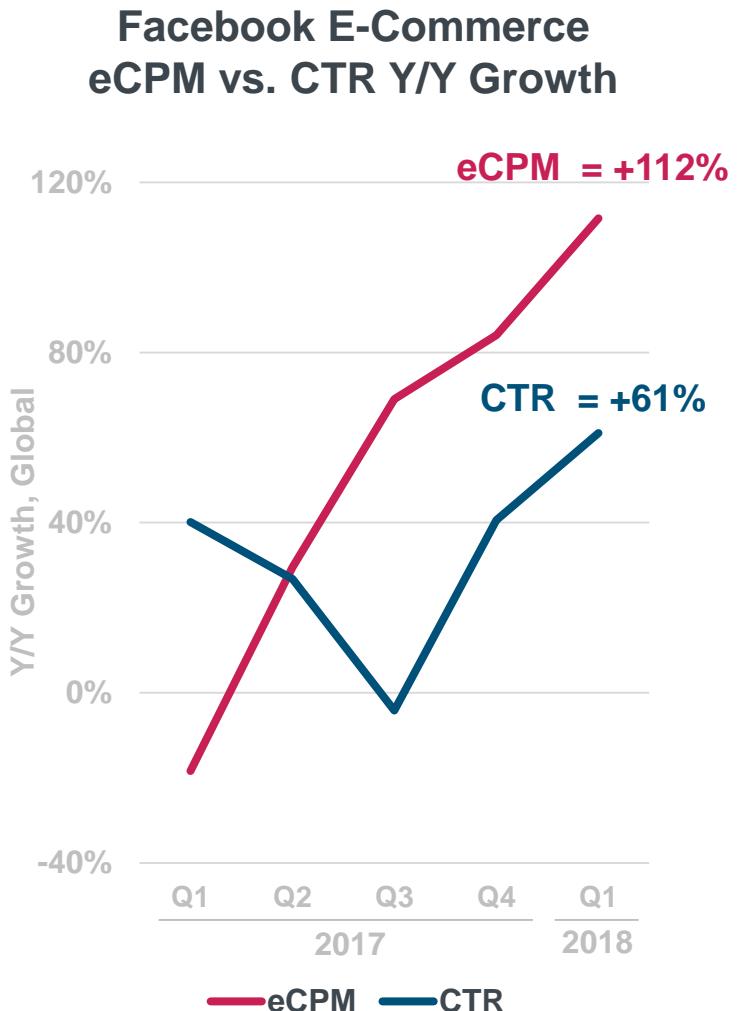

Source: Facebook, Nannigan's Quarterly Facebook Benchmarking Data. Note: Click-Through Rate is defined as the percentage of people visiting a web page who access a hyperlink text from a particular advertisement. CTR figures based on \$600MM+ of ad spend through Nannigan's platform.

Return on Ad Spend = Cost Rising @ Faster Rate than Reach

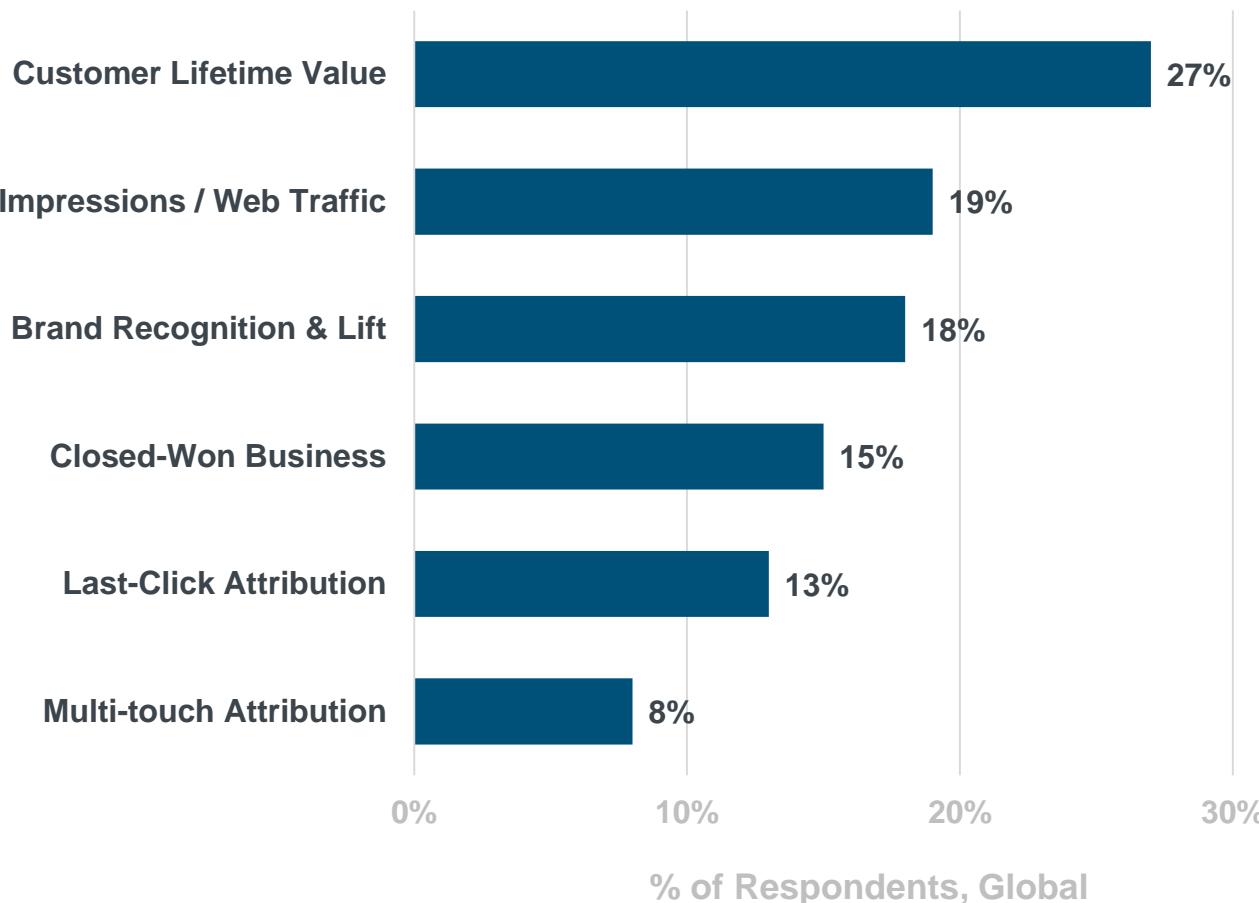

In performance-based [digital advertising] channels, competition for top placement has reduced ROIs over the years & been a source of margin pressure...

- Glenn D. Fogel, CEO & President, Booking Holdings Q3:17 Earnings Call, (11/17)

Customer Lifetime Value (LTV) = Importance Rising as... Customer Acquisition Cost (CAC) Increases

What Do You Consider To Be Important Ad Spending Optimization Metrics?

Source: Salesforce Digital Advertising 2020 Report (1/18). Note: n = 900 full-time advertisers, media buyers, and marketers with the title of manager and above. Respondents are from companies in North America (USA, Canada), Europe (France, Germany, Netherlands, UK, Ireland) and Asia Pacific (Japan, Australia, New Zealand) with each region having 300 participants. The survey was done online via FocusVision in 11/17.

Lifetime Value / Customer Acquisition Cost (LTV / CAC) = Increasingly Important Metric for Retailers / Brands

Facebook Ad Analytics Tools LTV Integration

The screenshot shows a modal window titled "Create a Value-Based Custom Audience". At the top, there's a section titled "Get Better Performing Lookalikes with LTV" featuring a user icon with a dollar sign and some explanatory text about how including customer value improves lookalike performance.

Below this, a three-step process is outlined:

- 1 Add LTV to your Custom Audience
- 2 Create a lookalike
- 3 Measure performance against goals like return on ad spend (ROAS)

A red box highlights the first step, "What is customer lifetime value (LTV)?". Inside this box, the definition of LTV is provided: "LTV is a value associated with your customers based on how much and how often they spend with your business over the course of their relationship with you. People with high LTV may be more expensive to acquire, but lead to greater value over time."

Below this, there are two collapsed sections: "How does LTV improve my lookalike performance?" and "How do I measure and test performance?". A link at the bottom of the box says "Learn more about how to prepare a customer file with LTV".

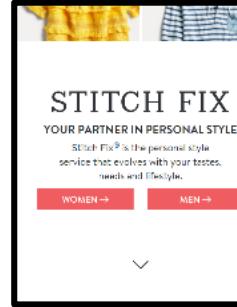

At the bottom of the modal are three buttons: "Cancel", "Back", and a blue "Get started" button.

Source: Facebook (3/17).

Alibaba =

'New Retail' Vision Starts in China...

*...through technology & consumer insights,
we [Alibaba] put the right products in front of right customers at the right time...
our 'New Retail' initiatives are substantially growing Alibaba's total addressable
market in commerce...*

*in this process of digitizing the entire retail operation,
we are driving a massive transformation of the traditional retail industry.*

***It is fair to say that our e-commerce platform is
fast becoming the leading retail infrastructure of China.***

*Since Jack Ma coined the term 'New Retail' in 2016,
the term has been widely adopted in China by
traditional retailers & Internet companies alike.*

New Retail has become the most talked about concept in business...

*Alibaba has three unique success factors that are
enabling us to realize the New Retail vision.*

...Alibaba = 'New Retail' Vision Starts in China

...Alibaba's
marketplace platforms handle billions of transactions each month
in shopping, daily services & payments.
These transactions provide us with the
best insights into consumer behavior
& shifting consumption trends. This puts us in the best position to
enable our retail partners to grow their business.

...Alibaba is a **deep technology** company.
We contribute expertise in cloud, artificial intelligence,
mobile transactions & enterprise systems to help our
retail partners improve their businesses
through digitization & operating efficiency.

...Alibaba has the most
comprehensive ecosystem of commerce platforms, logistics & payments
to support the digital transformation of the retail sector.

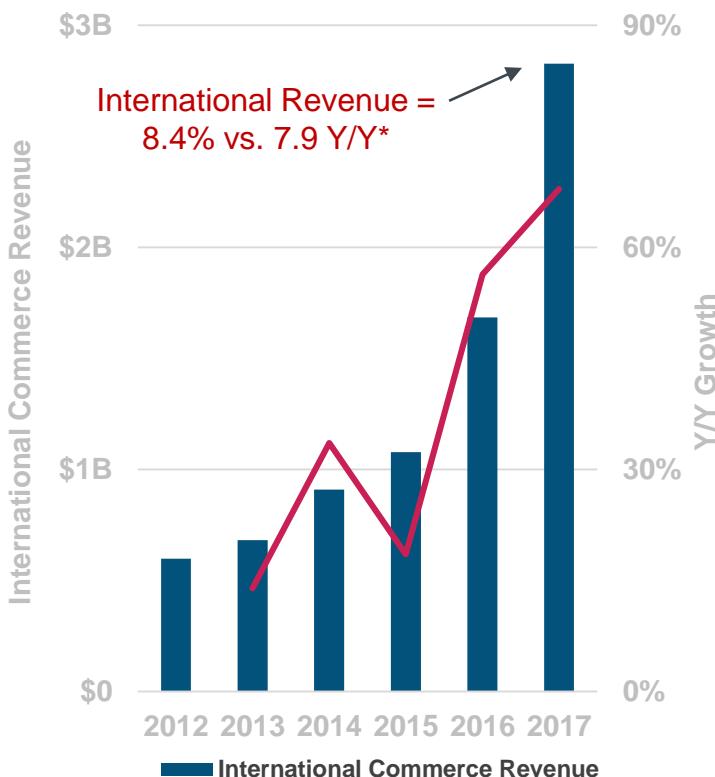

...Alibaba = Extending Platform Beyond China

Owing to Airbnb Earnings

No [Uber] driver-partner is ever told where or when to work.

This is quite remarkable – an entire global network miraculously ‘level loads’ on its own.

Driver-partners unilaterally decide when they want to work and where they want to work.

The flip side is also true – they have unlimited freedom to choose when they do NOT want to work...

The Uber Network...is able to elegantly match supply & demand without ‘schedules’ & ‘shifts’...

That worker autonomy of both time & place simply does not exist in other industries.

Natural Science & Engineering Higher Education = China Graduation Rates Rising Rapidly per National Science Foundation

Annual Natural Science & Engineering Degrees

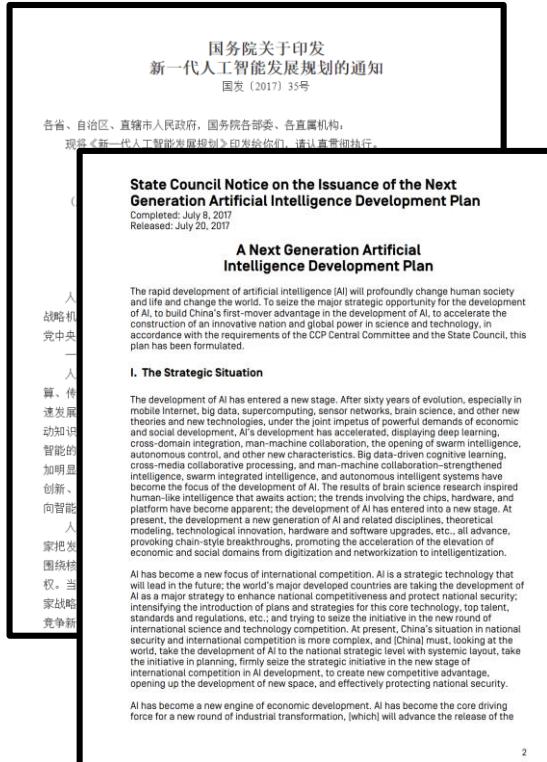

(Agricultural Sciences / Biological Sciences / Computer Sciences / Earth, Atmospheric & Ocean Sciences / Mathematics / Engineering)

Source: USA National Science Foundation analysis of National Bureau of Statistics (China), Government of Japan, UNESCO, OECD, National Center for Education Statistics, IPEDS, & National Center for Science / Engineering data. Note: Data for the majority of the countries were collected under same OECD, EU, and UIS guidelines & field groupings in the ISCED-F are similar to fields used in China, a major degree producer. Natural sciences include agricultural sciences; biological sciences; computer sciences; earth, atmospheric, and ocean sciences; & mathematics. EU-Top 8 for doctoral degrees includes UK / Germany / France / Spain / Italy / Portugal / Romania / Sweden. EU-Top 8 for first university degrees includes UK / Germany / France / Poland / Italy / Spain / Romania / The Netherlands. The # of S&E doctorates awarded rose from about 8K in 2000 to more than 34K in 2014. Despite the growth in the quantity of doctorate recipients, some question the quality of the doctoral programs in China (Cyranoški et al. 2011). The rate of growth in doctoral degrees in S&E and in all fields has considerably slowed starting in 2010, after an announcement by the Chinese Ministry of Education indicating that China would begin to limit admissions to doctoral programs & focus on quality of graduate education (Mooney 2007). Also in China, first university degrees increased greatly in all fields, with a larger increase in non-S&E than in S&E fields. China experienced an increase of almost 1.2MM degrees and up more than 400% from 2000 to 2014. China has traditionally awarded a large proportion of its first university degrees in engineering, but the percentage declined from 43% in 2000 to 33% in 2014.

Artificial Intelligence = USA Ahead...

China = Focused + Organized + Gaining

I'm assuming that [USA's] lead [in Artificial Intelligence] will continue over the next five years, & that China will catch up extremely quickly.

In five years we'll kind of be at the same level, possibly.

It's hard to see how China would have passed us in that period, although their rate of improvement is so impressively good.

**- Eric Schmidt, Chairman, US Defense Innovation Advisory Board,
Keynote Address at Artificial Intelligence & Global Security Summit, 11/13/17**

APPENDIX

Global Industry Classification System (GICS)

(Slides 39 / 41 / 42)

GICS is a four-tiered, hierarchical industry classification system. It consists of 11 sectors, 24 industry groups, 68 industries and 157 sub-industries. The GICS methodology is widely accepted as an industry analytical framework for investment research, portfolio management and asset allocation. Companies are classified quantitatively and qualitatively. Each company is assigned a single GICS classification at the sub-industry level according to its principal business activity. MSCI and S&P Global use revenues as a key factor in determining a firm's principal business activity. Earnings and market, however, are also recognized as important and relevant information for classification purposes.

Global industry coverage is comprehensive and precise. The classification system is comprised of over 50,000 trading securities across 125 countries, covering approximately 95% of the world's equity market capitalization.

Company classifications are regularly reviewed and maintained. Specialized teams from two major index providers — MSCI and S&P Global — have defined review procedures, refined over nearly 15 years.

Each sector includes the following industries:

- **Energy** = Energy Equipment & Services, Oil, Gas & Consumables Fuels
